My sense is that we have captured virtually all of ACES comments in the Town comments. On the issue of expanding the analytical parameter list, Mary (or I) may have misunderstood the plan, but my sense is that the parameter list proposed is adequate to do what needs to be done here. As to the capture zone expansion, the portion of the LF plume not captured looks to be going to the river, where it has had, and will continue to not have any significant impact. So I am not overly concerned about that. Plus, I think it may be advantageous from a Sinking Pond perspective to keep the ARS flows as low as is feasible, otherwise I worry the metals treatment will become problematic.

Having said this, I do not have a strong objection to including these ACES' comments if that is otherwise desirable. But I do not have time to add them in today as I am about to head off for an all day meeting.

Jim

Hi,

FYI, Please find attached ACES preliminary draft comments on the Draft Landfill Area Groundwater Pre-Design Work Plan for the WR Grace Site.

Mary

INTEROFFICE MEMORANDUM

TO: DON P. JOHNSON, TOWN MANAGER
FROM: FIRE CHIEF
SUBJECT: SITE PLAN SPECIAL PERMIT #02/19/03-388-AUTOPLEX REALTY LLC-60 POWDERMILL ROAD
DATE: 3/12/2007
CC: GARRY RHODES, BUILDING COMMISSIONER

Don:

After review of the above named plan I would offer the following comments. I am concerned about the encroachment of the static parking area to the side of the structure on the East side of the structure. It appears that cars may be able to be parked right up against the structure which may impede access and firefighting should it become necessary. Also, Garry Rhodes mentioned the possibility of a cut-through to the adjacent parking lot which would certainly assist in the maneuvering of fire apparatus should any apparatus enter the site.

Robert C. Craig

Fire Chief
